Climate & Weather Information for Water Utilities & Stormwater Managers
New England

Session 2: Drought (July 16th 1-3pm)
12:30pm Tech Check
Please join early to make sure you can connect properly.

1:00pm NOAA Intro

1:15pm Drought Response & Recovery: Town of Castine, ME

1:35pm Climate Info
Overview of historical & future drought conditions and resources available on the Northeast DEWS Dashboard.

1:45pm Demo: United States Drought Monitor (USDM)
Participants receive a brief demonstration and explanation of tools.
- The U.S. Drought Monitor is a weekly snapshot of drought conditions across the United States. The purpose of the map is to show people where drought is occurring, its spatial extent and severity, and the time scale of the associated impacts.

2:00pm Demo: EPA Drought Response and Recovery Guide
Participants receive a brief demonstration and explanation of tools.
- This Guide provides practical solutions to help drinking water utilities respond to and recover from drought.

2:15pm Hands-on Breakouts of United States Drought Monitor (USDM)
The hands-on portion will be used to elicit feedback to improve these tools or to address a need for new tools.

2:35pm Hands-on Breakouts of EPA Drought Response and Recovery Guide
The hands-on portion will be used to elicit feedback to improve these tools or to address a need for new tools.
